Docket No. F-8512

IN THE UNITED STATES PATENT AND TRADEMARK OFFICE

Applicant : Erwin JUNKER  
Patent No. : 7,147,547 B2  
Issued : December 12, 2006  
Serial No. : 10/523,269  
Filed : January 31, 2005  
For : METHOD AND DEVICE FOR GRINDING A  
ROTATIONALLY SYMMETRIC MACHINE PART  
Customer No. : 000028107

Certificate of Mailing Under 37 CFR 1.8

I hereby certify that this correspondence is being deposited with the United States Postal Service as first class mail in an envelope addressed to COMMISSIONER FOR PATENTS, P.O. Box 1450, Alexandria, VA 22313-1450 on March 19, 2007.

CERTIFICATE OF CORRECTION BRANCH  
Commissioner for Patents  
P.O. Box 1450  
Alexandria, VA 22313-1450

**Certificate**  
APR 02 2007  
**of Correction**

REQUEST FOR CERTIFICATE OF  
CORRECTION UNDER 37 C.F.R. § 1.323

Sir:

Applicants respectfully request that the Director issue a certificate of correction under 37 C.F.R. § 1.323 pursuant to 35 U.S.C. § 255 to correct a mistake in the above-identified patent, incurred due to errors in applicant's filings which are unintentional.

APR 06 2007

Detailed below are various errors in the patent which are of a typographical nature or are mistakes of minor character, the correction of which does not affect claim scope, add new matter, or require reexamination, and which therefore are appropriate for correction via the presently requested Certificate of Correction.

In the certificate of correction it is requested that the specification, claims and figures be corrected as follows:

In Fig. 2, the reference designator line for numeral 13 reference should extend to the horizontal axis line of the spindle axis 12 as shown in original Fig. 2 filed January 31, 2005. The designator line was incorrectly placed in the replacement drawing filed October 11, 2006. Adding the line is therefore not new matter and is a minor correction of an omission. A replacement Fig. 2 incorporating the correction is provided herewith and a copy of the originally filed Fig. 2 is provided herewith to evidence support of the change.

Fig. 7, the reference designator 37 is to be added to indicate the end-face bore in the axle part 18. This change was submitted with replacement drawings filed with the Amendment filed February 16, 2006, which were approved by the Examiner. The change was unintentionally omitted from the formal drawings filed October 11, 2006. A replacement Fig. 7 having the correction made therein is provided herewith and a copy of

the amended Fig. 7 filed with the amendment on February 16, 2006 is provided herewith to evidence support of the change which was approved by the Examiner.

The following changes are to be made to the body of the specification and are submitted to be mistakes either of a typographical nature of minor character, which do not introduce new matter and do necessitate reexamination:

Column 1, line 31 change "parts" to - -part- -.

Column 3, line 12 insert - -the- - between "to" and "movement".

Column 4, line 9 change "the machine component" to - -the machine part-

-.

Column 5, line 2 change "them" to - -the- -.

Column 5, line 42 insert - -by- - between "supported" and "a".

Column 6, line 18 insert - -a- - between "is" and "third".

The following changes are to be made to the claims and are submitted to be mistakes either of a typographical nature or of minor character:

Column 9, claim 1, line 21 insert - -a- - between "at" and "spindle".

In claim 1, the addition of the word “a” renders the claim grammatically correct, the addition would be readily understood on the face of the claim, and is submitted to be merely a typographical omission.

Minor amendments to the claims further include:

Column 10, claim 3, column line 23, claim line 2, insert --second-- between “and” and “cylindrical”.

Column 10, claim 4, column line 26, claim line 2, insert --second-- between “and” and “cylindrical”.

Column 10, claim 9, column line 39, claim line 2, insert --second-- between “and” and “cylindrical”.

Column 10, claim 10, column line 42, claim line 2, insert --second-- between “and” and “cylindrical”.

In claims 3, 4, 9 and 10 the word “second” was omitted from the intended recitation of “first and second cylindrical parts.” The addition of the word “second” renders the claim grammatically correct since the word “parts” is plural. It would be readily understood on the face of the claim, that the ungrammatical recitation the words “first and” followed by the words “cylindrical parts” could only be the result of a word processing error omitting the word “second.” The necessity that word “second” be the

omitted word is further evidenced by the preceding claims of the dependent claims having only introduced a “first cylindrical part” and a “second cylindrical part” in claim 1. No further cylindrical parts are introduced.

The error was unintentional and is submitted to be merely a typographical omission which went unnoticed by the Examiner because “first and cylindrical parts” was naturally and understandably subconsciously read as ““first and second cylindrical parts” and therefore escaped both the Examiner’s and Applicant’s scrutiny until after patent issuance.

## UNITED STATES PATENT AND TRADEMARK OFFICE CERTIFICATE OF CORRECTION

PATENT NO. : 7,147,547 B2

Page 1 of 2

DATED : December 12, 2006

INVENTOR(S) : Erwin JUNKER

It is certified that error appears in the above-identified patent and that said Letters Patent is hereby corrected as shown below:

Fig. 2, the reference designator line for numeral 13 reference is extended to the horizontal axis line of the spindle axis 12.

Fig. 7, the reference designator 37 is added to indicate the end-face bore in the axle part 18.

Column 1, line 31 change "parts" to - -part- -.

Column 3, line 12 insert - -the- - between "to" and "movement".

Column 4, line 9 change "the machine component" to - -the machine part- -.

Column 5, line 2 change "them" to - -the- -.

Column 5, line 42 insert - -by- - between "supported" and "a".

Column 6, line 18 insert - -a- - between "is" and "third".

Column 9, claim 1, line 21 insert - -a- - between "at" and "spindle".
